INNOVIA MANUFACTURING

UTILIZES THE FLOW WATERJET CUTTING MACHINE

Water jet services

Waterjet cutting can handle jobs that are often thought to be impossible.

The Waterjet Cutting process allows for the cutting of complex and intricate shapes in a variety of materials cleanly and precisely.

Waterjet cutting is ideal for soft materials such as plastics and aluminum. As well as hard materials such as steel and titanium. Any sheet size up to 6'x12' from .050" up to 4" can be cut cleanly without the use of gasses or oils.

Some of the many industries we service include:

- *Marine Construction
- *Custom Signage
- *Flooring
- *Custom Motorcycles and Automobiles
- *Bathroom and Kitchen
- *Residential and Commercial Applications
- *Aerospace
